(54) RAPIDLY DISINTEGRATING PREPARATION IN MOUTH CAVITY AND ITS PRODUCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a rapidly disintegrating preparation in a mouth cavity, capable of being easily taken by a person with an advanced age or a child who has poor swallowing capability, and easily taken without using water even by an adult who has the swallowing capability.

SOLUTION: This rapidly disintegrating preparation in a mouth cavity also having a strength, is obtained by blending a material capable of being damped sufficiently for forming with a humidification and maintaining the form with drying after the forming such as sugars such as glucose, fructose and sucrose, a sugar alcohol such as mannitol and sorbitol, and a water soluble high polymer such as a polyvinylpyrrolidone and dextrin, with a medicine, being damped with the humidification at a low density, forming, and then drying.
